

Committees 2019

Patient Experience & Community Advisory Committee (4 vacancies)

Seeking community members who have a passion for making a difference to the patient experience. Members provide direction and leadership to the integration of consumer, carer and community views into all levels of health service -operations, planning and policy development. This committee also monitors patient feedback and the community participation plan.

Preventing and Controlling Healthcare Associated Infections (2 vacancies)

Seeking a person with an interest in reducing patient harm from infections through contributing to the work of prevention and control measures for infection control.

Preventing Delirium and Managing Cognitive Impairment (2 vacancies)

Seeking a person who has cared for a loved one with cognitive impairment, (including delirium), who could contribute to a system of caring to minimise harm for those patients at risk.

Predicting, Preventing and Managing Aggression and Violence (2 vacancies)

Seeking a person with an interest in minimising the risk of aggression and harm in the health service environment.

Preventing and managing pressure injuries (1 vacancy)

Seeking a person interested in contributing to strategies for staff education and patient engagement. The aim is to reduce harm for patients at risk of or experiencing pressure injuries and continued management.
