

# Workshop with Prof Paul Glasziou

**Topic:** 'How to keep up to date in an era of information overload'

Nursing skill mix refers to the number, type and educational preparation of nurses. There are a number of studies that have demonstrated a clear association between nursing skills mix and patient outcomes. However, there are important methodological limitations to many of these studies that need to be considered when appraising this body of work. In this presentation I will discuss these methodological challenges and consider how these may be overcome.

## **Biography:**

Professor Paul Glasziou

Professor Paul Glasziou is Professor of Evidence-Based Medicine at Bond University. He was a part-time General Practitioner for 20 years. He is currently the Director of the Centre for Research in Evidence-Based Practice at Bond University and previously the Director of the Centre for Evidence-Based Medicine in Oxford from 2003-2010. He has authored over 300 peer-reviewed journal articles, and his key interests include identifying and removing the barriers to using high quality research in everyday clinical practice and more specifically on improving the clinical impact of publications by reducing the more than \$85 Billion annual loss from unpublished and unusable research (Chalmers, Glasziou, Lancet 2009).

**Date:** Wednesday 7th October 2020

**Time:** 4pm - 6pm

**Where:** Zoom

**RESEARCH WEEK**  
5-9 OCTOBER 2020  
INSPIRED RESEARCHERS  
Northern Health
