

# Neuroscience Nursing

Neurology & Stroke Care is an ever increasing service within Northern Health, providing the opportunity for career advancement within Neuroscience Nursing.

The Graduate Certificate in Nursing (Neuroscience) will advance your assessment skills enabling meaningful and effective care planning for the individual patient during their journey.

Neuroscience nursing incorporates education of the patient and their carers for ongoing management at home. Discharge planning is vital from the time of admission.

Neuroscience Nursing is complex; challenging, and often patient conditions are not curative but focus on managing chronic conditions signs & symptoms for a better quality of life.

Neuroscience Nursing has a diverse patient cohort, each patient will present with various care needs requiring nurses to expand their knowledge base throughout their careers.

**Northern Health will run the Graduate Certificate in Nursing (Neuroscience) in partnership with University of Tasmania commencing February 2021**
